COVID-19 Snapshot Report

Portage County Cumulative COVID-19 Data Overview:

Key for reviewing table subjects: Cumulative County Counts for Portage County (Kent City Jurisdiction only)

Portage County (including Kent City)	Total Cases ²			Total Lives Lost		
	28340			347(20)		
	Confirmed Cases			Probable Cases ¹		
	22915			5425		
	Kent City Jurisdiction			Portage County excluding Kent City		
	4538			23802		
	Males	Females ¹		Age Range		Median Age
	46%	54%		1 weeks to 102 years		37 (22)
	White	Black	Asian	Hispanic	Other	Unknown
	77%	6%	1%	3%	4%	9%
	Total Hospitalizations			Total ICU Admissions		
	1489(130)			192(21)		
	Age Range for Hospitalized			Age Range for ICU		
	1 weeks² to 99 years			16 years³ to 94 years		
	Portage County % Positivity ⁴					
	38.19%					
	Hospital Statistics from Last 7 Days ⁵					
	% Of New Hospital Admissions		New Hospital Admissions		% Of Beds Used	
	47.37%		28		30.18%	

Source: Ohio Disease Reporting System (ODRS) for cases since March 13, 2020

¹ 1% of sex is not reported

² In previous reporting periods, the youngest age has changed. Limitations it takes to conduct a case interview (when we confirm accuracy of record data) resulted in a delay in correcting this information.

³ In previous reporting periods, the youngest age was different. Limitations it takes to conduct a case interview (when we confirm accuracy of record data) resulted in a delay in correcting this information.

⁴ Percent Positivity for Portage County is pulled from the CDC COVID-19 Tracker on a 7-day metric: https://covid.cdc.gov/covid-data-tracker/#county-view|Ohio|39133|Risk|community_transmission_level

⁵ Hospital Statistics are pulled from the CDC COVID-19 Tracker on a 7-day percentage change: https://covid.cdc.gov/covid-data-tracker/#county-view|Ohio|39133|Risk|community_transmission_level

Current Status of COVID-19 Cases Reported in Portage County

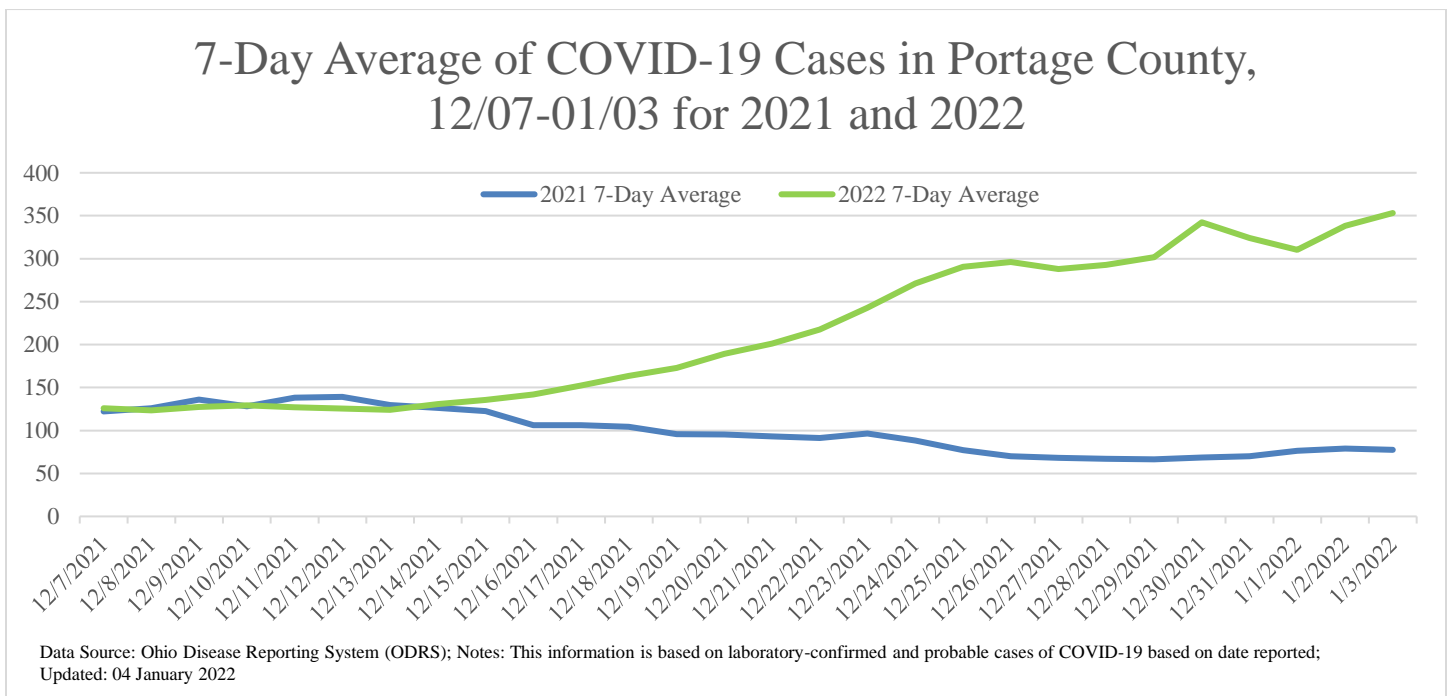

Indicator	12/07-12/13	12/14-12/20	12/21-12/27 ⁶	12/28-01/03 ⁷
New Cases Reported Compared to Previous Week	No Change (-2%)	Increase (34%)	Increase (34%)	Increase (18%)

For COVID-19 case reporting, Portage County Public Health (PCHD) reports case count data by the date each case is reported. This provides PCHD and community partners a real-time picture of case reporting and public health response, such as case interviews, contract tracing, outbreak investigation, and mitigation efforts. Portage County reports confirmed and probable cases. On an occasion, Portage County will report data based on when symptoms were first experienced (onset date). When this method is applied, the figure will clarify the source and type of data used. Limitations about this snapshot report should be noted. The most recent two weeks of the data curve are preliminary and can potentially change as more data is collected (i.e., a college student's address will be reported with their home jurisdiction and not the jurisdiction where they reside most of the time, etc.). Overall, numbers can change as time progresses (i.e., deaths can take up to 6 months, hospitalization can take 6 weeks, etc.). Data was a snapshot as of **January 04, 2022**.

Portage County Surveillance Data:

COVID-19 Case Data

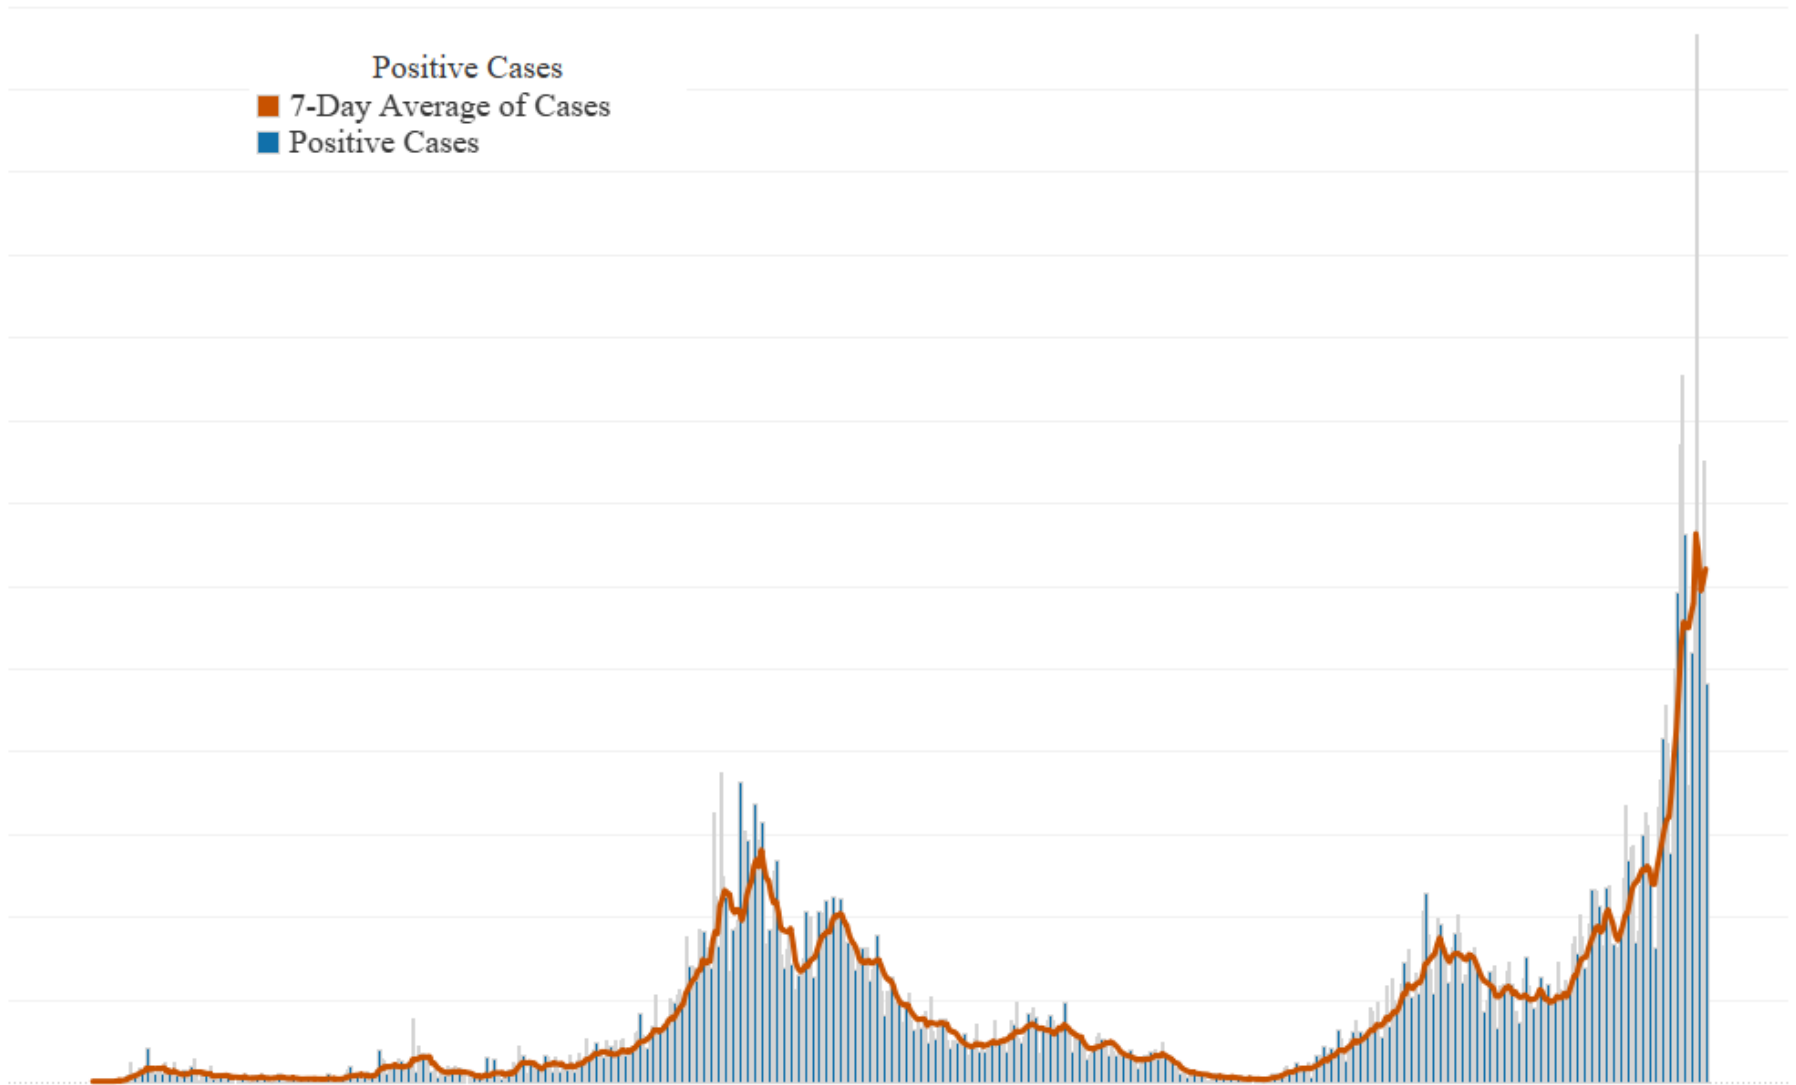

Data based on the reporting date indicates that there has been an increase in the 7-day average of COVID-19 cases reported in the past week. On January 03, 2022, Portage County had a **7-day average of 311 cases per day** (Kent City Jurisdiction is 47 cases per day).

⁶ The most recent two weeks of the data curve are preliminary and can potentially change as more data is collected (i.e., a college student's address will be reported with their home jurisdiction and not the jurisdiction where they reside most of the time, etc.).

⁷ The most recent two weeks of the data curve are preliminary and can potentially change as more data is collected (i.e., a college student's address will be reported with their home jurisdiction and not the jurisdiction where they reside most of the time, etc.).

COVID-19 Positive Cases Reported to Portage County, 3/13/2020 to Current

Note: The most recent two weeks of the data curve are preliminary and can potentially change as more data is collected (i.e., a college student's address will be reported with their home jurisdiction and not the jurisdiction where they reside most of the time, etc.).

Date source: Ohio Disease Reporting System (ODRS). This information is based on laboratory-confirmed and probable cases of COVID-19 based on date reported for both Portage County Health District and Kent City Health District; Updated: 04 January 2022

COVID-19 Positive Cases Reported for a Two Week Period by Age Group for Kent City and Portage County

Kent City Jurisdiction

Portage County Jurisdiction

Date source: Ohio Disease Reporting System (ODRS). This information is based on laboratory-confirmed and probable cases of COVID-19 based on date reported based on date reported for one incubation period (one incubation period is 14 days); Updated: 4 January 2022

COVID-19 Case Data for 17 and Younger

On January 4, 2022, for Portage County, the 7-day average for children 17 years of age or younger was **34 cases per day**. On December 30, 2021, a record number (81 cases) of children 17 years of age or younger was reported to Portage County Health District for COVID-19.

COVID-19 Positive Cases Age 17 and Younger Reported to Portage County, 3/13/2020 to Current

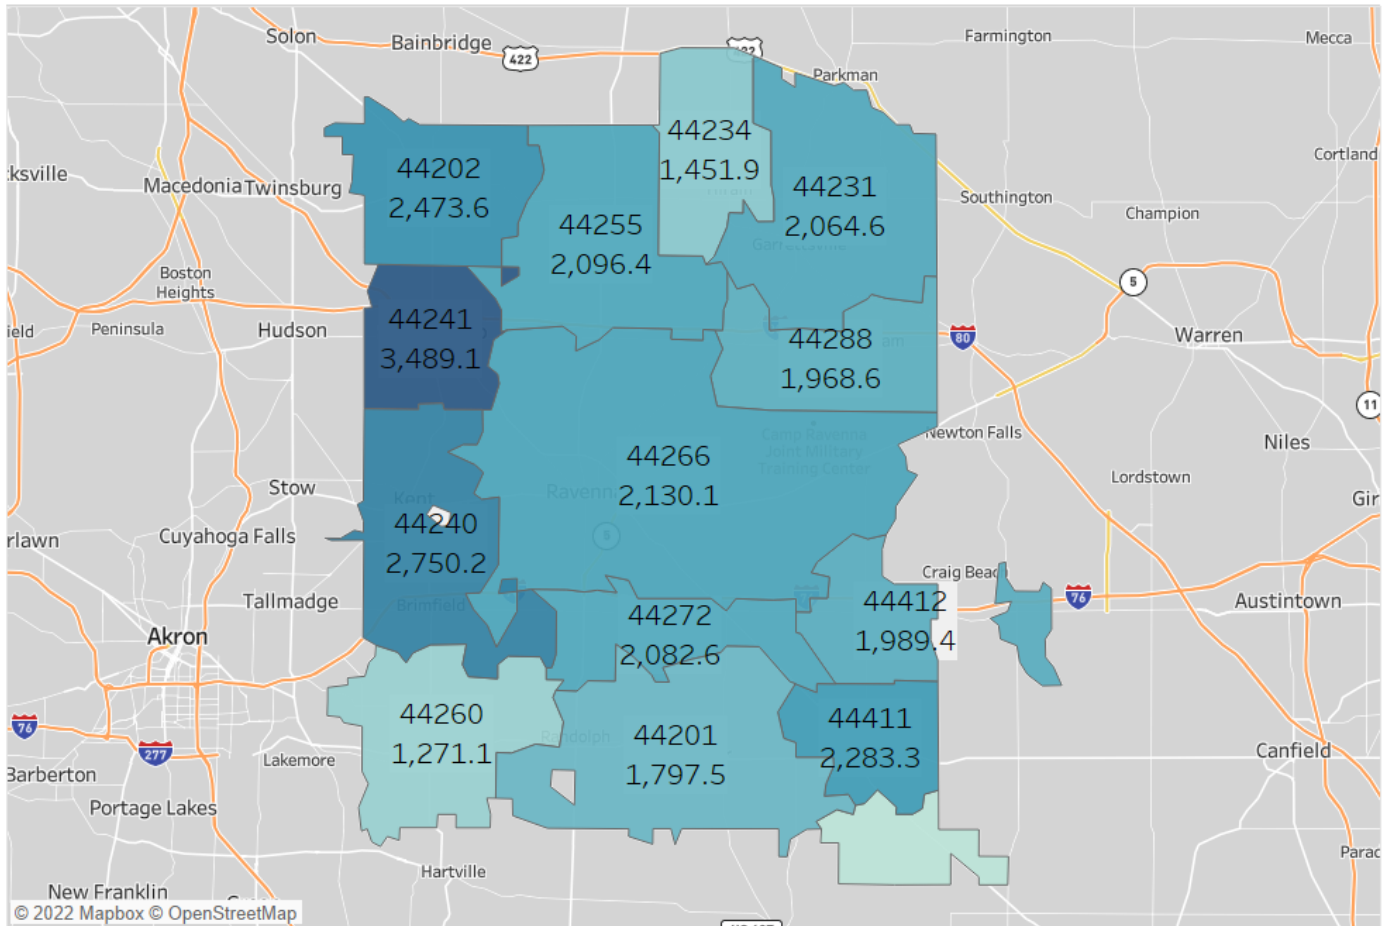

Note: The most recent two weeks of the data curve are preliminary and can potentially change as more data is collected (i.e., a college student's address will be reported with their home jurisdiction and not the jurisdiction where they reside most of the time, etc.).

Date source: Ohio Disease Reporting System (ODRS). This information is based on laboratory-confirmed and probable cases of COVID-19 based on date reported for both Portage County Health District and Kent City Health District; Updated: 4 January 2022

Incidence rate of COVID-19

According to the Ohio Department of Health Coronavirus Dashboard,⁸ the State of Ohio is experiencing a state average of **1364.7 cases per 100,000** residents over a 2-week period and Portage County is higher at **1908.1 cases per 100,000** over a 2-week period. Below is a graphic that breaks out new cases per 100,000 for a 2-week period by Zip Code based on data reported to Portage County Health District.

New Cases per 100k, by Zip Code

Data Source: Ohio Disease Reporting System (ODRS); Notes: This information is based on laboratory-confirmed and probable cases of COVID-19 based on date reported for one incubation period (one incubation period is 14 days); 2 week period: Updated: 4 January 2022

COVID-19 Vaccine Data

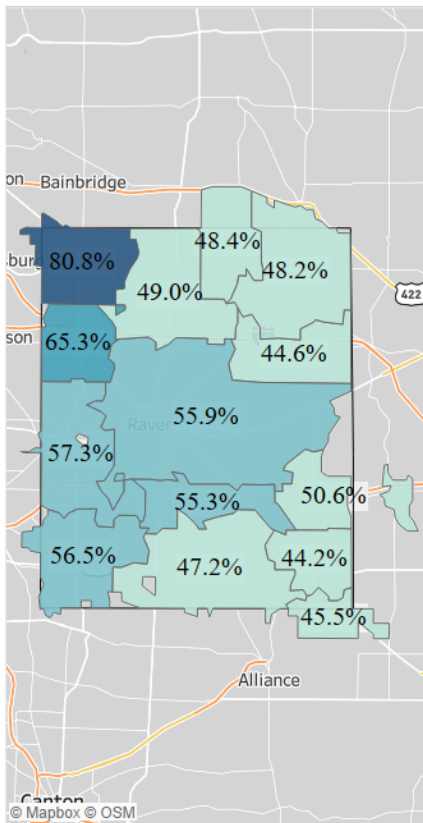

Currently, **61.0%** of Portage County eligible residents⁹ (**57.6%** of all of Portage County) have received at least one vaccine dose COVID-19. Vaccines are reported, by providers, through ImpactSiiS, the state immunization database. There are a few vaccine providers that do not report through ImpactSiiS (e.g. federal agencies). Therefore, caution should be taken when reviewing people that have been vaccinated. In addition, the Zip Code 44243 vaccine rate is 4% and is not displayed on the graphic below. Numbers for this Zip Code can be skewed because it is a university/college town where a large percentage of the population traditionally has a second primary address in a different county or state.

Vaccine Rates, by Zip Code for Portage County

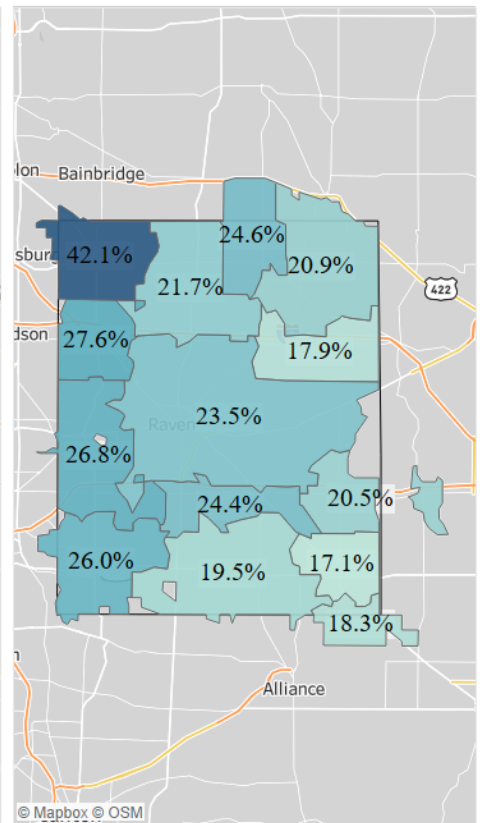

Vaccine Started Rates, by Zip Code for Portage County

Vaccine Completed Rates, by Zip Code for Portage County

Vaccine Additional Dose Rates, by Zip Code for Portage County

Data Source: ImpactSiiS with contributions from the Ohio Hospital Association. Color shows percent vaccinated since vaccinations began in December 2020 = number of people vaccinated divided by the estimated population count. Update: 4 January 2022

Vaccine rates include ages 5 and older and this change has increased the population that is eligible for the vaccine. When comparing the previous reporting period to the current report, it will appear that the target population vaccination rates have declined.

⁹ Currently, age 5 and older are eligible for vaccination. This percentage does not include those 4 or younger who are currently unable to be vaccinated for COVID-19.

Vaccination Started Rates by Age for Portage County
